

Summary (Copy to your Typora notes)

Action	macOS	Windows
Format document	⇧ ⌘ F	Shift+Alt+F
Command Palette	Cmd+Shift+P → Format Document	Ctrl+Shift+P → Format Document
Auto-format on save	Enable “Format On Save”	Enable “Format On Save”

THE DEFINITIVE CLEAN-CODE SHORTCUT SHEET

(HTML • CSS • JS — VS Code — Mac & Windows)**

This is the cheat sheet that makes messy code impossible.

Copy it into Typora. Print it. Use it in class.

1) FORMAT EVERYTHING (THE MOST IMPORTANT)

Format whole document

- **Mac:** ⇧ + ⌘ + F
- **Windows:** Shift + Alt + F

Fixes:

- ✓ indentation
- ✓ spacing
- ✓ nesting
- ✓ extra whitespace removed
- ✓ tags aligned

This alone wins 80% of teacher approval.

2) INDENTATION CONTROL (NO STRANDED LINES)

Indent selected lines

- **Mac:** `⌘ + ]`
- **Windows:** `Ctrl + ]`

Unindent selected lines

- **Mac:** `⌘ + [`
- **Windows:** `Ctrl + [`

Use this after pasting large blocks of HTML/CSS/JS.

3) KILL STRANDED CHARACTERS / FIX STRUCTURE

Delete entire line

- **Mac:** `⌘ + ⬆ + K`
- **Windows:** `Ctrl + Shift + K`

This removes broken tags, half-typed CSS rules, or mistaken Emmet expansions **instantly**.

4) MOVE CODE BLOCKS CLEANLY

Move line/block up or down

- **Mac:** `⌘ + ⬆` or `⌘ + ⬇`

- **Windows:** `Alt + ↑` or `Alt + ↓`

Perfect for reorganizing:

- `<li>` list items
- `<div>` blocks
- CSS rules
- JS function lines

No copy-paste needed — structure stays perfect.

5) DUPLICATE WITHOUT BREAKING STRUCTURE

Duplicate line or block

- **Mac:** `⌘ + ↑ + ↓`
- **Windows:** `Shift + Alt + ↓`

Great for:

- quickly making `<li>` lists
 - duplicating `<div class="box">`
 - repeating CSS selectors
 - duplicating JS `if` blocks
-

6) FIX MISALIGNED HTML TAGS

VS Code has a built-in command:

Balance Outward / Balance Inward

- **Mac:** `⌘ + ↑ + A` (outward), `⌘ + ↑ + J` (inward)

- **Windows:** `Ctrl + Shift + A` / `Ctrl + Shift + J`

This selects:

- a whole tag block
- the inner content
- the outer wrapper

Prevents **opening/closing tag mismatches** — a teacher's favorite complaint.

7) MULTI-CURSOR = FIX EVERYTHING FAST

Add multiple cursors

- **Mac:** `⌘ + Click`
- **Windows:** `Alt + Click`

Select next matching word

- **Mac:** `⌘ + D`
- **Windows:** `Ctrl + D`

Select all matches

- **Mac:** `⌘ + ⌥ + L`
- **Windows:** `Ctrl + Shift + L`

Use these to:

- fix repeated stranded commas
- remove repeated stray semicolons
- adjust attributes in repeated tags

- align CSS properties
-

8) EMMET: NO MORE HAND-TYPING HTML

These avoid stranded characters because Emmet never misnests tags.

Expand HTML structures instantly

Type:

```
ul>li*5
```

Press **Tab** → perfect list, no mistakes.

Examples:

```
header>nav>ul>li*3  
section>div.container>p
```

Quick element shortcuts:

- `.box` → `<div class="box"></div>`
- `#main` → `<div id="main"></div>`
- `p.mytext` → `<p class="mytext"></p>`
- `img` → `<img src="" alt="">`
- `a` → `<a href=""></a>`

Zero stranded tags. Zero missing closes. Perfect indentation.

9) WRAP TEXT IN TAGS (FIX BROKEN HTML)

Wrap selection with HTML tag

- **Mac:** `⌘ + ⬆ + P` → “Emmet: Wrap with Abbreviation”
- **Windows:** `Ctrl + Shift + P` → same

Enter the tag:

`p`, `div`, `span`, `strong`, etc.

10) CLEAN TRAILING SPACES

Remove trailing spaces automatically:

Settings → search “Trim Trailing Whitespace” → enable

Teachers LOVE this because it removes invisible garbage.

11) AUTOFORMAT ON SAVE (PREVENT ALL MESS FOREVER)

Settings → search: **Format On Save** → enable

Now every:

- **Cmd + S** (Mac)
- **Ctrl + S** (Windows)

produces clean, perfect HTML/CSS/JS.

12) EVERY USEFUL SHORTCUT IN ONE TABLE

Action	macOS	Windows
Format document	⇧ ⌘ F	Shift+Alt+F
Indent	⌘]	Ctrl]
Unindent	⌘ [	Ctrl [
Duplicate line	⌘⇧↓	Shift+Alt+↓
Move line	⌘↑ / ↓	Alt↑ / ↓
Delete line	⌘⇧K	Ctrl+Shift+K
Multiple cursor	⌘ Click	Alt Click
Select next	⌘D	CtrlD
Select all	⌘⇧L	Ctrl+Shift+L
Wrap with tag	Cmd+Shift+P	Ctrl+Shift+P
Emmet expand	Tab	Tab
Balance tags	Cmd+Shift+A	Ctrl+Shift+A
Format on save	enable in settings	enable in settings
